Summary

I'm a student at Marmara University. I'm currently studying Computer Education and Instructional Technologies (CEIT). Before university I went to a technical high school about computer technologies.

At highschool worked fourty five days as intern at Piri Reis University's IT Division.

I know web and desktop programming enough to create a real project. I can use Adobe Photoshop and alike programmes for photo-manuplating, logo design and etc. I can learn quickly. I worked on a school project with IoT. I am advanced on MS Office programs. I worked on web-sites with PHP or ASP.NET, desktop and automation programs with C#, mobile games with Unity and C#, IoT with RaspberryPi, mobile apps with MIT AppInventor and Android Studio and so. I love learning new things.
